**Size:** 20.06 MB **Version:** March 2013

The purpose of the study is to identify a grade-separated railroad crossing location and configuration for South Kelso, which includes reviewing the impacts of eliminating an at-grade crossing at Yew Street, and addressing safety issues related to access to the residential area and property west of the railroad and South Pacific Avenue. The study is needed in order to determine viable options before the planned addition of the third railroad mainline track proposed as part of HSR program.
