

Minor Road Reservoirs, Seismic and Structural Evaluation Report August 2012 ^[1]

Date Uploaded:

Friday, May 8, 2015

Document File:

 [minor_rd_reservoir_report_08-2012.pdf](#) ^[2]

Executive Summary

This report documents the findings of a comprehensive review of the City of Kelso's (City's) Minor Road Reservoirs performed by Kennedy/Jenks Consultants. The City has expressed concerns pertaining to the structural integrity and longevity of the Minor Road Reservoirs and the site soils strength and stability. The reservoirs were originally built in 1924 and have a history of leaking; the source and magnitude of the leakage is unknown. Whenever possible, Kenney/Jenks Consultants relied on documentation of previous field investigations, in order to assist with the timely completion of this report.
