

Anchor Point Feasibility Study ^[1]

Date:

Wed, 10/19/2016

The City of Kelso worked closely with David Evans and Associates, Lower Columbia Developmnet, Columbia - CPC, and Winters Anchor Point, to complete the Anchor Point Feasibility Study in March 2016. The Study looked conceptually at design and site access development alternatives. The study was funded through a Washington State Community Economic Revitalization Grant and additional funding received by the owners of the Winters Anchor Point industrial site.
