

Six Year Capital Improvement Program ^[1]

Date Uploaded:

Tuesday, January 17, 2017

Document File:

 [2017-2022_cip_complete.pdf](#) ^[2]

This the annual update to the Six-Year Capital Improvement Program. This document contains the known capital improvement projects that are needed for each 6-year span. This document is intended to be a tool for the City Council, staff, and citizens to communicate priorities and identify the resources that are available to complete these projects. Most of the projects contained in this document originated from various city master plans. Some projects have been identified by Master Plans, Council direction, and others from staff observations. Staff uses this program for guidance in the budget process, to qualify for grants, track the needs of the City, and to provide documentation for funding programs.
